Food Consumption: Households in the West, Spring 1977

Nationwide Food Consumption
Survey 1977-78,
Report No. H-5

ORIGINAL

Trade names are used in this report solely for the purpose of providing specific information. Mention of a trade name does not constitute a guarantee or warranty of the products by the U.S. Department of Agriculture or an endorsement of the Department over other products not mentioned.

Although data collection in the Nationwide Food Consumption Survey 1977-78 was completed in March 1978, this is the only source of national information on household consumption of food, by quantity and money value, since the last survey was conducted in 1965-66. The results are still valid and may be used in coming years in the evaluation of many issues including food consumption and nutrition education.

Issued September 1982

ACKNOWLEDGMENTS

The Nationwide Food Consumption Survey 1977-78 was conducted by the Consumer Nutrition Center, Human Nutrition Information Service (formerly Human Nutrition, Science and Education Administration), U.S. Department of Agriculture. The sample was designed and the data were collected and processed by National Analysts, Inc., under contract with the Center. The data for this publication were tabulated by the Federal Prison Industries, U.S. Department of Justice, also under contract with the Center.

Work on the survey and publication was the concern of many individuals in the Consumer Nutrition Center. Robert B. Reese had overall responsibility for planning and supervising the survey. Mary Y. Hama supervised a team composed of Dorothy A. Baker, Helen C. Crutchfield, Kim M. Hatfield, Linda W. Ingwersen, Lorraine R. McCullen, and Constance D. Ward that developed plans for coding and tabulating the collected household food consumption data, analyzed findings, and wrote this report. Brucy C. Gray, Jan L. Janiczek, and Mills B. Weinstein monitored the data processing and tabulation performed by the contractor. Betty B. Peterkin, Frank N. Hepburn, and the Nutrient Data Research Group provided assistance at different phases of the survey planning and analysis. Ellen W. Caswell and Mildred T. Pati provided assistance in matters relating to word processing. Johna L. Pierce provided editorial and production assistance.

During the planning of the survey, special attention was given to the needs of potential users, particularly the Economic Research Service and Food and Nutrition Service of USDA, Food and Drug Administration and Social Security Administration of the Department of Health and Human Services, and other Federal agencies.

The study was carried out under the general direction of Robert L. Rizek, Director of the Consumer Nutrition Center, Human Nutrition Information Service.

Food Consumption: Households in the West, Spring 1977

by the Consumer Nutrition Center
Human Nutrition Information Service

HIGHLIGHTS

The money value of food used by housekeeping households in the West averaged $60 in a week during the spring of 1977. Of this amount, three-fourths ($46) was the value of food used at home and one-fourth ($15) was the expense for meals and snacks eaten away from home. Most of the food used at home was bought, except for $3 worth received without direct expense. Meals eaten away from home accounted for $12 and snacks for $3.

The average household size was 2.79 in terms of 21-meal-at-home-equivalent persons (See "Definitions and Explanations"). The average money value of food per person in a week was as follows:

All food	$21.61
Money value of food used at home	16.33
Bought	15.30
Received without direct expense (home-produced and/or received as gift or pay)	1.03
Expense for meals and snacks eaten away from home	5.28

These figures include the money value of alcoholic beverages and all items commonly thought of as food. They do not include cigarettes, soaps, and other nonfood items purchased in grocery stores. Food received without direct expense was valued at the average price per pound paid for comparable food by survey households in the same region.

All households used some bought food for home consumption during the survey week. Home-produced food was used by 32 percent of the households and food received as gift or pay was used by 45 percent.

Meals or between-meal snacks bought in restaurants and other eating establishments during the week were reported by 80 percent of the households. At least one household member in 43 percent of the households had one or more meals without direct expense, such as guests' meals or those in payment for work.

Averages conceal the great variation among households. For example, the average money value of food used at home in a week by households in the West was $16.33 per person. But for 21 percent of the households, the value of a week's food was less than $12 per person and for 29 percent, $20 or more.

Households allocated the largest share of their home food dollar, 35 cents, to meat, poultry, fish, and eggs. The next largest share, 20 cents, went for vegetables and fruit, including juices. About 13 cents out of each dollar went for milk and milk products other than butter; 12 cents for beverages such as coffee, tea, soft drinks, punches, ades, beverage powders, and alcoholic beverages; 11 cents for flour, cereals, and bakery products; and 6 cents was divided evenly between fats and sweets. The remaining 3 cents was used for other foods.

The average consumption of food at home per person per day (as brought into the household) was as follows: 2-1/2 cups of milk or its equivalent in milk products (in terms of calcium content); slightly more than 1-1/2 ounces of fats, oils, and salad dressings; about 2-2/3 ounces of flour and cereal products; 2-2/3 slices of bread; and 1-3/4 ounces of other bakery products. The per-person average also included about 10 ounces of meat, poultry, and fish; one small egg; about 2 ounces of sugar and other sweets; 2-1/2 ounces of potatoes and sweetpotatoes; 1-1/4 pounds of vegetables and fruit, including juices; plus varying amounts of beverages, nuts, soup, mixtures, and condiments.

Differences by Region[1]

In the spring of 1977, both the average money value of food used at home and the expense for food eaten away from home per household were highest in the Northeast and lowest in the South. The money value of home food differed by $6.82 in a week between these two regions. Values for all four regions were as follows:

Item	Per household in a week: Northeast	North Central	South	West
	Dollars			
Money value of all food...........	68.61	59.52	56.25	60.29
Money value of food used at home	51.00	45.32	44.18	45.56
Bought.......................	49.21	42.06	40.03	42.68
Home-produced.................	.74	2.29	2.72	1.30
Expense for food away from home.	17.61	14.19	12.07	14.73
Household size (21 meals at home = 1 person)......................	(2.73)	(2.80)	(2.80)	(2.79)

---

[1] Data on food consumption in each of the four regions are given in separate reports.

The average expense for eating out in a week was $5.54 higher per household in the Northeast than in the South. About 80 percent of the households in each region except the South (71 percent) bought and ate some food away from home.

Household size in each region was similar, averaging about 2.8 persons. Values per person for home food varied from $18.71 in the Northeast to $15.80 in the South, a difference of $2.91.

Consumption of food at home per person also differed by region. Households in the South reported greater use of fats and oils, flour and cereal, eggs, sugar and sweets, and vegetables other than potatoes. At the same time, their overall use of milk and milk products, fruit and fruit juice, soup, and nuts was somewhat lower than that found in the other regions.

Not only was there regional variation in the use of major food groups but also in the use of particular foods within these groups. Traditional food consumption patterns in the South persisted despite sizable population gains over the past decade as a result of migration from other regions. For example, households in the South used markedly larger quantities of self-rising flour, cornmeal, hominy grits, buttermilk, evaporated milk, lard, sweetpotatoes, dark-green leafy vegetables, and dried peas and beans--foods generally associated with Southern food habits.

Food group	Per person in a week			
	Northeast	North Central	South	West
	Pounds			
Milk, cream, cheese (calcium equivalent)	8.68	8.90	7.37	9.32
Fats, oils	.68	.68	.77	.67
Flour, cereal	1.13	1.13	1.51	1.16
Bakery products	1.90	1.86	1.78	1.82
Meat, poultry, fish	4.96	4.88	5.06	4.34
Eggs	.59	.67	.74	.67
Sugar, sweets	.81	.91	1.11	.82
Potatoes, sweetpotatoes	1.15	1.51	1.32	1.12
Other vegetables, including juice	3.68	3.39	4.15	3.82
Fruit, including juice	4.43	3.76	3.59	4.42
Beverages	3.91	4.20	3.32	3.27
Soup	.28	.28	.25	.30
Nuts, peanut butter, condiments	.38	.37	.30	.39
Other mixtures	.26	.25	.24	.24

Foods used in appreciably larger amounts in certain regions than in others (20 percent or more than the average for the United States as a whole and 15 percent more than that used by at least two other regions) were as follows:

Region	Specified foods
Northeast........	Fluid whole milk, fluid skim milk, yogurt, butter, salad and cooking oil, rice, pasta, veal, lamb, turkey, canned tunafish, shellfish, fresh and commercially frozen fruit juice, tea, fruit ades, punches, drinks.
North Central....	Fluid lowfat milk, cottage cheese, salad dressing other than mayonnaise, potato chips, fruit ades, punches, drinks.
South............	Buttermilk, evaporated milk, lard, hydrogenated fat, self-rising flour, cornmeal, hominy grits, biscuit dough, sugar, sweetpotatoes, fresh dark-green leafy vegetables, dried vegetables.
West.............	Fluid lowfat milk, dry nonfat and lowfat milk, cream, hot breakfast cereal, bread other than white (including whole wheat), lamb, variety meat, honey, fresh deep-yellow vegetables, lettuce, citrus fruit, nuts.

Differences by Urbanization

Suburban households in each region had food at home with a higher money value than did households in the other urbanizations. In the West, the money value of food used at home was $47.73 for households in the suburbs, $47.62 in nonmetropolitan areas, and $41.84 in central cities. On a per-person basis, however, central city households had food worth more than households in other urbanizations.

In terms of money value, home-produced food accounted for 3 percent of home food used in the West. The value of home-produced food was more for nonmetropolitan households, 6 percent, than for central city and suburban households. Nonmetropolitan households in the North Central, however, led all other regions in the use of home-produced food.

The average expense for food away from home in the West ranged from $15.48 in the suburbs to $13.42 in the nonmetropolitan areas, a difference of $2.06. The greatest urbanizational difference among the regions was between suburban and nonmetropolitan households in the South. These suburban households spent nearly $8 more on food away from home than did nonmetropolitan households.

Quantities of food used per person in a week reflect further differences by urbanization. In the West, suburban households used 10.2 pounds per person of milk and milk products (calcium equivalent) compared with 8.9 pounds by central city households, and 8.3 pounds by nonmetropolitan households. The difference between suburban and nonmetropolitan households is equivalent to 3-1/2 cups of milk. Suburban households also exceeded other households in the use of eggs as well as soups, gravies, and sauces. Central city households reported greater use of flour and cereal products--particularly, breakfast cereals; meat, poultry, and fish--particularly chicken; fresh and commercially processed vegetables and fruit; and beverages. Their use of fresh vegetables and fresh fruit was substantially greater--0.6 pounds more of vegetables than households in suburban and at least 0.9 pounds more of fruit than those in nonmetropolitan areas. Households in nonmetropolitan areas used larger quantities of fats and oils--especially shortening; bakery products; sugar and sweets; potatoes; juices; and mixtures.

Differences by Income

Average 1976 income before taxes reported by households was $15,941 in the North Central, $15,412 in the West, $15,143 in the Northeast, and $12,225 in the South. Regardless of region, households at successively higher income levels were larger and used food at home with a higher money value. Households with incomes of $20,000 and over in each region except the West used food at home worth twice as much as households with incomes under $5,000. In the West, the value of food at home amounted to $56.27 for households with incomes of $20,000 and over (high income), $44.15 for $10,000-$14,999 (middle income), and $33.30 for those under $5,000 (low income).

Home-produced food in the West was used by 38 percent of the households at the highest income level and by 20 percent at the lowest. Although the value of the home-produced food was greater among high- than low-income households ($1.79 and $1.54, respectively), it accounted for 3 percent of the money value of food for the high-income group and 5 percent for the low-income group.

As expected, the expense for food away from home increased with income in all regions. Households with incomes of $20,000 and over spent 5 to 6 times as much for food away from home as households with incomes under $5,000, except in the West, where 3-1/2 times as much was spent. In the West, 92 percent of the high-income households compared with 66 percent of the low-income households reported expense for food away from home.

Compared with low-income households, high-income households in all regions generally used more milk and milk products; bakery products; meat; fresh vegetables; fresh fruit; beverages; and nuts, condiments, and leavenings per person. On the other hand, low-income households used more flour and cereal, eggs, commercially canned vegetables, and dried vegetables and fruit.

Specific foods used in larger quantities per person by high- than low-income households in the West were lowfat milk, nonfat dry milk, frozen desserts, butter, hot breakfast cereals, beef, lettuce, commercially canned fruit, commercially frozen vegetables, and frozen fruit juice. Households with low incomes, in contrast, used more evaporated milk, cream, shortenings, fresh sweetpotatoes, cabbage, canned fruit juice, and dried vegetables.

Food Consumption Comparison between 1965 and 1977 Surveys

The average money value of food used at home per person increased between 1965 and 1977--by 75 percent in the West, 87 percent in the North Central, 92 percent in the Northeast, and 99 percent in the South. The expense for food away from home ranged from an increase of 153 percent in the West to 198 percent in the North Central. During the same period, the Consumer Price Index (CPI) measured increases in prices for food at home of approximately 100 percent and for food away from home of 120 percent. The difference in the money value between the two periods apparently reflected the rise in food prices and changes in the kinds and the amounts of foods used by households.

In the West, the share of the household food dollar allocated to food away from home was 18 percent in 1965 and 24 percent in 1977, an increase of 6 percentage points. Shares increased 8 percentage points in both the Northeast and North Central, but 4 percentage points in the South.

Average household size in 21-meal-at-home-equivalent persons declined in all four regions between the two survey periods because of fewer household members and smaller proportions of meals consumed at home. In the West, household size decreased from 3.13 persons in 1965 to 2.79 persons in 1977. To help adjust for household size differences between 1965 and 1977, consumption comparisons are based on quantities of food used per person in households.

Shifts occurred in quantities of various types of food used per person by households between 1965 and 1977. In all four regions, changes for most of the major food groups were generally in the same direction, although not always to the same extent.

Consumption of milk and milk products (calcium equivalent) per person changed slightly between the two surveys. The West was the only region with a higher consumption of this food group in 1977 than in 1965, a 3-percent increase. Consumption of milk and milk products decreased 1 percent in the North Central, 5 percent in the Northeast, and 8 percent in the South. Within this food group, the use of fluid skim and lowfat milk increased dramatically in all regions--from 252 percent in the West to 437 percent in the North Central. Increases were principally in the use of lowfat milk. Whole milk consumption at the same time decreased from 12 percent in the South to 48 percent in the North Central.

The downward trend in the use of fats and oils evident in the 1965 survey continued into the next decade. The quantity declined from 8 percent in the Northeast to 18 percent in the South. Within this food group, substantial decreases in the use of butter and shortening were accompanied by increases in salad dressing.

The use of bakery products, including bread, dropped 26 percent in the Northeast and about 20 percent in the other regions. Along with this trend, the use of the flour and cereal group decreased 6 percent in the North Central, 11 percent in the West, and 22 percent in the South. The Northeast was the only region with higher consumption in 1977 than in 1965, an increase of 5 percent. All regions experienced a notable increase in the use of cold breakfast cereal.

Use of meat in the Northeast and North Central remained about the same in 1977 as in 1965, but rose 15 percent in the South and fell 5 percent in the West. The gain in the South was attributed to the greater use of beef. The amount of poultry used increased 23 percent in the Northeast but decreased 9 percent in the West. Greater fish consumption occurred in both the North Central and Northeast between the two survey periods, but remained at the 1965 level in the other regions. Use of eggs decreased about 20 percent in every region. The combined consumption of meat, poultry, fish, and eggs decreased 8 percent in the West but increased in the other regions.

Consumption of sugar and sweets dropped about 25 percent in each region. This is consistent with the decrease of other ingredients used in home baking such as eggs, flour, and fats.

Fresh vegetables, fresh fruit, and juice increased in use from 1965 to 1977 in each region, whereas the use of dried and commercially canned vegetables and fruit decreased. Consumption of fresh vegetables other than potatoes increased from 5 percent in the North Central to 13 percent in the Northeast and South. Usage of fresh white potatoes declined about 25 percent in the North Central and West compared with a 36 percent decline in the Northeast and a 14 percent decrease in the South. Quantities of fresh fruit increased 17 percent in the West, 8 percent in the South, 6 percent in the North Central, and 3 percent in the Northeast. At the same time, use of commercially canned fruit decreased substantially from 31 percent in the South to 51 percent in the West. Large gains were made in the use of frozen fruit juice in all four regions and of fresh fruit juice in every region except the North Central.

The increase in beverages ranged from 18 percent in the Northeast to 43 percent in the North Central, reflecting the continuing popularity of soft drinks, fruit ades, drinks, and punches. Alcoholic beverages underwent a marked upswing in quantity consumed--about 25 percent in the Northeast and West, 55 percent in the South, and 60 percent in the North Central. This may be both because of the growing use of alcoholic beverages (wine in the West) and the respondents' greater candidness in revealing alcohol consumption. In contrast, coffee consumption fell in each region principally because of less use of ground coffee in 1977 than in 1965. Use of instant coffee increased in the South and West but not enough to offset the decline in the use of ground coffee.

Percentage changes since 1965 for selected food items that shifted in the same direction for every region were as follows:

Food	Percent change in per-person consumption from 1965 to 1977			
	Northeast	North Central	South	West
	Increases			
Skim, lowfat fluid milk	281	437	286	252
Yogurt	338	354	675	980
Cheese	28	11	24	7
Salad dressing	35	36	7	18
Cold breakfast cereal	29	38	60	13
Turkey	36	105	182	57
Fish	21	23	2	4
Lettuce	13	9	14	8
Frozen fruit juice	104	103	98	77
Soft drink	20	51	43	41
Fruit ade, drink, punch, nectar	30	39	27	42
Alcoholic beverages	24	60	55	25
Nuts (shelled weight)	55	26	15	66
	Decreases			
Whole milk	26	48	12	33
Evaporated milk	49	57	64	70
Frozen milk dessert	1	14	9	16
Butter	44	60	46	53
Shortening	62	43	44	47
Flour	26	33	36	28
Prepared mix	19	7	6	22

Onions	14	20	17	27
Commercially canned fruit	42	44	31	51
Coffee	45	42	32	47

INTRODUCTION

This report presents data for spring 1977 from the household portion of the Nationwide Food Consumption Survey 1977-78 (NFCS) conducted by the U.S. Department of Agriculture (USDA) during April 1977 through March 1978. The study is part of USDA's continuing research program on human food and nutrition that was started at the turn of the century. Through the years, the Department has contributed much to the knowledge of American food habits by collecting information about the kinds and quantities of food people eat as well as the money value of that food. Dietary levels of different groups within the population are also determined from calculated estimates of the nutrient content of the food reported and recommended nutrient levels. Objectives of the USDA food consumption surveys have been expanded to serve new and diverse needs for information relating to consumers and the food they eat.

- Congress, the Department of Agriculture, and other Federal agencies use these data to develop and administer public programs and policies that relate to production, marketing, and consumption of food.
- Research and development laboratories, food manufacturers, and food industries use these data to adjust the producing, processing, and marketing of food closer to the needs and wants of consumers.
- Nutritionists, home economists, educators, and welfare workers use these data to assess the current nutritive value of diets of the population and to develop guidelines and programs for improving dietary levels in the United States.

Thus, the nationwide food consumption surveys are benchmarks to measure the current status of the U.S. diet and the changes that have occurred since the previous survey. Data provided by the recent survey may be used in evaluating public policies and economic, social, educational, and regulatory programs associated with people and the foods they eat.

The early fledgling studies were small-scale, intensive investigations and sometimes involved only a few respondents. Since the 1930's, however, the Department has conducted six food consumption surveys on a national scale: 1936, 1942, 1948 (urban only), 1955, 1965-66, and 1977-78. Only the 1965-66 and 1977-78 surveys included all four seasons of the year and provided information on diets of selected individuals within the household as well as on food consumption of the total household.

In the NFCS 1977-78, a stratified probability sample of households was surveyed from April 1977 through March 1978. Households were selected to represent the universe of households in each of four Census regions and three urbanizations during each of the four seasons. The information was collected from about 15,000 households in the 48 conterminous States and about 34,000 individuals from these households. In addition, 5 supplemental surveys yielded information for about 5,000 households in which at least 1 member was older than 64 years of age, about 4,700 households with members participating or eligible to participate in the Food Stamp Program, 3,100 households in Puerto Rico, 1,100 urban households in Alaska, and 1,250 households in Hawaii. All of these supplemental surveys provide data on household food consumption and individual food intake.

The data on food used in a surveyed household were collected in an interview with the person identified as most responsible for food planning and preparation. Trained interviewers, who used an aided-recall questionnaire, recorded the kind (such as ground beef and skim milk), the form (such as fresh, commercially canned, or frozen), the quantity, and the cost, if purchased, of each food or beverage used in the household during the 7 days before the interview. Respondents also gave information on home food production and preservation, the number of meals eaten at home and away by household members, and meals and snacks eaten by guests. For use in classification, respondents provided other data, such as income, participation in food programs, age, education, and employment of the male and female head of household.

The methodology used to obtain household food consumption in the NFCS 1977-78 was the same as that used in the 1965-66 survey with few exceptions. In 1965-66, the households were interviewed at the initial contact, but in 1977-78, households were contacted at least 7 days prior to the interview and asked to keep grocery receipts, shopping lists, menus, package labels, or other aids to help them recall the food used in the 7-day period. Both surveys measure food consumption at the level at which the foods come into the kitchen. Thus, the data should be interpreted as consumption in an economic rather than a physiological context.

LIST OF TABLES

Table No.		All urbanizations Page	Central city Page	Sub-urban Page	Non-metropolitan Page
1.	Distribution of households in survey	13	13	13	13
2.	Money value of food by source. Percent reporting; average money value of food at home and expenditures for food away from home per household per week; average household size	14	73	132	191
3-23.	Food used at home: Percent using; quantity and money value of food per household per week:				
3.	Food group totals	15	74	133	192
4.	Milk, cream, cheese	20	79	138	197
5.	Fats, oils	24	83	142	201
6.	Flour, cereal	26	85	144	203
7.	Bakery products	29	88	147	206
8.	Meat	31	90	149	208
9.	Poultry, fish	38	97	156	215
10.	Eggs	39	98	157	216
11.	Sugar, sweets	40	99	158	217
12.	Potatoes, sweetpotatoes	43	102	161	220
13.	Fresh vegetables	45	104	163	222
14.	Fresh fruit	50	109	168	227
15.	Commercially canned vegetables, fruit	53	112	171	230
16.	Commercially frozen vegetables, fruit	56	115	174	233
17.	Juice--Vegetable, fruit	58	117	176	235

---

[1] Consists of central city, suburban, and nonmetropolitan.

[2] Columns (5)-(12) equal percent of column (2).

[3] See "Sample Analysis," Collection Counts.

[4] Households not classified by income excluded from percent distribution but shown in parentheses as percent total.

[5] Households not classified by income are mainly those not providing requested data and those that were not household units in 1976.

TABLE NOTES

The following notes are for tables 2-24. They provide the type of information usually found at the end of individual tables. "General Notes" contain information and explanations applicable to all or most tables. "Specific Notes" refer to a particular table, group of columns, or single column of a table.

General Notes

1. Average quantity and money value per household and percentage of households are based on all households in the cell. See table 1 for cell counts.

2. Component items may not cross-add to totals because of rounding.

3. The asterisk (*) indicates some but less than 0.005 pound, 0.005 dollar, or 0.05 percent.

4. See table 3 for food group totals for tables 4-22.

5. Homemade mixtures on hand at the beginning of the 7-day period if used during the survey week are included in prepared form rather than as ingredients. Data for all other foods are as they were brought into the kitchen. See "Definitions and Explanations," Food at Home.

6. Food from Meals on Wheels and similar programs that provide food in the home are included in tables 3-22.

7. Commercially canned food includes baby food. See table 23 for separate data on baby food.

8. Food substitutes are included in the group of foods they replace.

9. Lists of foods in the "Specific Notes" are not necessarily all-inclusive.

10. Mention of a trade name does not constitute an endorsement of the product by the U.S. Department of Agriculture over other products not mentioned.

Specific Notes

Table 2.--Money value of food by source

Col. No.	Heading	Notes
		Includes money value of alcoholic and other beverages.
2....	Household size (number).............	In equivalent persons; 21 meals at home equal 1 person. See "Definitions and Explanations," Household Size.
3-5..	Households reporting (percent)......	All households reported expenditures for food used at home; therefore, the percent of households reporting food in columns 3, 4, and 5 (100.0) has been omitted.
6....	Not bought, total...................	Including money value of food received from Meals on Wheels and similar programs.
4-8..	At home.............................	Including money value of packed lunches and other food carried from home. See "Definitions and Explanations," Money Value of Food Used at Home.
11...	Bought, snacks......................	Between-meal food and beverages; supplements to packed lunches.
12...	Meals not bought....................	See "Definitions and Explanations," Food Away From Home Not Bought.

Table 3.--Food group totals

Col. No.	Heading	Notes
	See tables 4-22 for detailed data.	
2	Milk, cream, cheese (calcium equivalent)	See "Definitions and Explanations," Calcium Equivalent.
7	Poultry, fish	Also shellfish.
8	Eggs (fresh equivalent)	See "Definitions and Explanations," Eggs: Fresh Equivalent.
11	Fresh vegetables	Other than potatoes and sweetpotatoes. Also home-canned and home-frozen.
12	Fresh fruit	Also home-canned and home-frozen.
15	Juice--vegetable, fruit (single-strength equivalent)	Single-strength equivalent of frozen concentrated juice, including fresh vegetable juice not shown separately in table 17.
16	Dried vegetables, fruit	Also home-canned and home-frozen.
18	Soups, sauces, gravies	Excluding baby and junior soups, which are included in table 22; including frozen soups not shown separately in table 20.

Table 4.--Milk, cream, cheese

Col. No.	Heading	Notes
	Fresh fluid milk:	
2....	Total	Cols. 3-8 and imitation milk.
3....	Whole	Also low sodium, concentrated, goat, filled milk.
5....	Skim, nonfat	Milk with 0.5 percent milkfat or less.
6....	Lowfat	Milk with 1-2 percent milk-fat; also sweet acidophilus.
8....	Chocolate	Also chocolate milk drink, carryout-type thick shakes.
	Processed milk:	
9....	Total (calcium equivalent)	See "Definitions and Explanations," Calcium Equivalent for explanation of equivalent; cols. 10, 13, and frozen milkshakes.
10...	Canned, total	Cols. 11, 12, and soy milk, infant formula (milk, meat, soy base); diet beverages, milkshakes, chocolate milk drink.
11...	Canned, evaporated	Also goat; skim; filled milk products such as Milnot and Topic.
13...	Dry, total	Cols. 14, 15, and soy milk, infant formula (milk, soy base), diet beverages.

Table 4.--Milk, cream, cheese--Continued

Col. No.	Heading	Notes
14...	Dry milk	Lowfat, nonfat, buttermilk, whole, goat; also instant protein powder and eggnog beads.
15...	Mixtures	Malted milk, beverage mixes (cocoa, instant breakfast) containing dry milk.
	Cream:	
17...	Sweet, light	Fluid and powdered.
18...	Sweet, heavy	Fluid and whipped.
19...	Half-and-half	Sweet, sour; also eggnog.
20...	Sour	Also sour cream substitutes.
22...	Substitutes, creamers	Products such as Coffeemate, Coffee Rich.
23...	Substitutes, toppings	Products such as Cool Whip, Redi-Whip, Dream Whip.
	Frozen milk dessert:	
24...	Total	Cols. 25-27 and frozen dietary desserts, frozen yogurt.
25...	Ice cream	Also sundaes; ice cream cake or roll.
26...	Ice milk	Also frozen custard.

Table 4.--Milk, cream, cheese--Continued

Col. No.	[illegible]	Notes
	Cheese:	
28...	Total...............................	Cols. 29-36 and imitation cheese.
29...	American, natural...................	Cheddar; also Colby, Coon, Longhorn.
30...	American, process...................	Cheddar; also Pimento.
31...	Swiss...............................	Emmentaler; also Gruyere.
32...	Cottage.............................	Also Ricotta, Bakers, Farmer's, Dutch, Pot.
33...	Cream...............................	Also Neufchatel.
35...	Dry cheese..........................	Parmesan, Romano, Sapsago.
36...	Other...............................	Bel Paese, Blue, Caciocavallo, Gjetost, Gorgonzola, Liederkranz, Muenster, Mysost, Port du Salut, Stilton, Camembert, Limburger, Brick, Brie, Roquefort, Gouda, Edam, Mozzarella, Provolone.
37...	Dips................................	Also cheese balls.

Table 5.--Fats, oils

Col. No.	Heading	Notes
	Table fats:	
4....	Margarine, total	Cols. 5, 6, and diet imitation, reduced fat, whipped, liquid margarine; flavored spreads, half margarine and half butter.
	Cooking fats:	
8....	Animal	Lard, chicken fat, suet, bacon drippings.
9....	Vegetable	Hydrogenated fat; also compounds of vegetable and animal fats.
10...	Salad, cooking oils	Also lecithin.
	Salad dressing:	
16...	Other	Mayonnaise type, russian, Roquefort, blue, thousand island, yogurt, sour cream, sandwich spread, tartar sauce, green goddess, caesar, horseradish sauce, coleslaw dressing.

Table 6.--Flour, cereal

Col. No.	Heading	Notes
	Flour:	
3....	Wheat	White, whole-wheat, buckwheat, cake meal, gluten, low-protein.
4....	Other	Corn, rice, potato, oat, soy (flour and flakes), triticale, rye, barley, millet, peanut, cottonseed, carob, jerusalem artichoke.

Table 6.--Flour, cereal--Continued

Col. No.	Heading	Notes
	Prepared mix:	
7....	Biscuit, roll, muffin	Also cornbread, coffeecake, popover.
8....	Cake	Including boston cream pie, cheesecake, gingerbread.
9....	Pie	Piecrust mix, piecrust mix and filling; also graham cracker crust mix.
10...	Cooky	Including brownie and date bar mix.
11...	Other	Bread, cream puff, eclair, apple crunch, pudding cake, cruller, potato flour mixes.
	Breakfast cereal:	
17...	Hot, other	Corn, rice, rye.
18...	Cold, total	Cols. 19-24 and dry baby cereal.
19-24	Cold	Plain or presweetened, added fruit or nuts.
	Other cereal, pastes:	
26...	Rice	Including rice fries.
30...	Macaroni, other pastes	Spaghetti, noodles; corn, whole-wheat, high-protein pastes; chinese long rice, pastina.

Table 6.--Flour, cereal--Continued

Col. No.	Heading	Notes
31...	Popcorn..............................	Popped and unpopped, with or without seasoning, oil, cheese, sugar.
32...	Cornstarch...........................	Also tapioca, barley, buckwheat groats, bulgur, rice polishings, sorghum grits, malt, millet, potato starch.

Table 7.--Bakery products

All columns include ready-to-eat, brown-and-serve and partially baked products.

	Bread:	
3....	White................................	Including egg, cheese, italian or grecian, potato, added protein breads, salt-rising, french or vienna.
5....	Other................................	Rye, other grain, white and whole-wheat, cracked wheat, raisin, rice, pumpernickel, cornbread, boston brown, oatmeal, mixed grains; bread crumbs, stuffing mix, seasoned coatings for meat or poultry, bread sticks, melba toast, tortillas, zwieback.
	Other bakery products:	
7....	Crackers.............................	Unsweetened crackers, any grain; also cracker meal, chow mein noodles.

Table 7.--Bakery products--Continued

Col. No.	Heading	Notes
9....	Muffins, biscuits....................	Also waffles, pancakes, french toast.
10...	Cake.................................	Including cheesecake, boston cream pie, gingerbread.
11...	Pie..................................	Commercially and home-frozen fruit pies, assumed not baked. All other pies, considered baked. Also cobblers, tarts, dumplings, strudel, turnovers, piecrust, eclairs, cream puffs, french pastry.
12...	Cookies..............................	Also graham crackers, animal crackers, teething biscuits.
13...	Sweet buns, coffeecake...............	Also danish pastry, toaster pastries, breakfast bars such as Breakfast Squares, Figurines.
15...	Other baked goods, total.............	Cols. 16, 17, and blintzes, ice cream cones, milk product snacks such as yogurt chips.
17...	Other baked goods, other grain snacks..............................	Wheat, corn, mixed grain, rye, snacks such as Cheese Tid-Bits, Fritos, Chee-tos, Doo-Dads.

Table 7.--Bakery products--Continued

Col. No.	Heading	Notes
18...	Doughs, batters, total..............	Cols. 19-21 and piecrust (not baked), cooky, sweet roll, coffeecake, doughnut dough, chinese soft noodles, and danish pastry.
21...	Doughs, batters, biscuit, pancake, total......................	Cols. 22, 23, and muffin batter.

Table 8.--Meat

Fresh meat also includes home- and commercially frozen meat and cooked meat with cut specified. Canned meat includes baby or junior meat, home- and commercially canned and cooked meat with cut not specified.

	Beef:	
4....	Steak, round.........................	Including minute, cube, swiss.
6....	Steak, porterhouse..................	Also club, T-bone.
7....	Steak, other........................	Flank, chuck, rib, plate, filet mignon, delmonico, tenderloin, and flaked and formed steaks.
9....	Roast, chuck........................	Also brisket, california, cross-cut, pot roast, shoulder.
12...	Roast, rump.........................	Also top sirloin.
13...	Stewing.............................	Also boiling beef for soup.

Table 8.--Meat--Continued

Col. No.	Heading	Notes
14...	Corned, chipped, dried..............	Also pastrami.
15...	Ground.............................	Including ground chuck, ground round, beef with other meat or with hydrated vegetable protein.
16...	Other, raw..........................	Plate, shank, short ribs, oxtails, smoked beef sausage, beef bacon, stewing, boiling and soup beef with bone.
	Pork:	
24...	Fresh, (not cured or smoked), other.............................	Boston butt, picnics, shoulder, steak, spareribs, pig feet, neckbones, fat cuts, ground pork, miscellaneous pork cuts.
26...	Cured, smoked ham..................	Including sliced boiled ham.
28...	Cured, smoked, salt pork............	Also fresh jowls.
29...	Cured, smoked, other................	Pork shoulder, picnics, boston butt, canadian bacon, sausage, pork chops, loin roast, pickled pork products, pork breakfast strips, hocks, pork loin roll, spareribs, miscellaneous pork cuts.
30...	Canned, cooked......................	Including ham, bacon, sausage, cracklings, pork skins, spareribs, miscellaneous pork cuts.

Table 8.--Meat--Continued

Col. No.	Heading	Notes
	Veal:	
31...	Total	Cols. 32-34 and canned and cooked veal.
34...	Stewing, ground	Also breast, plate, shank, patties, riblets, mock "chicken" legs, veal for soup.
	Lamb:	
35...	Total	Cols. 36-38 and canned and cooked lamb.
38...	Stewing, ground	Also breast, shank, patties, lamb for soup, riblets, lamb head.
	Variety meat:	
39...	Total	Cols. 40, 41, and game.
40...	Liver	Including canned and cooked liver.
41...	Other	Brains, chitterlings, tripe, gizzard, heart, kidney, tongue, lungs, sweetbreads, including canned and cooked.
	Lunch meat:	
43...	Frankfurters	Including frankfurters made from poultry; canned frankfurters.
45...	Other, canned	Also refrigerated meat spread.

Table 8.--Meat--Continued

Col. No.	Heading	Notes
	Meat substitutes:	
48...	Substitutes........................	Products such as Loma Linda Vegeburger, Morningstar Breakfast Strips; also meal supplements and replacements such as Ensure liquid nutrition, liquid protein.
49...	Extenders..........................	Textured vegetable protein.

Table 9.--Poultry, fish

Col. No.	Heading	Notes
	Poultry:	
2-5..	....	Including fresh, frozen, canned, cooked.
5....	Other..............................	Cornish game hen, duck, goose, guinea hen, pheasant, quail, squab, other game birds.
	Fish, shellfish:	
8....	Fish, fresh, frozen................	Also cooked.
9....	Fish, smoked, dried................	Also salted, cured, pickled; kippered herring.
11...	Fish, canned.......................	Salmon, sardines, mackerel, caviar, anchovies, gefilte fish, roe, herring, fish flakes, sturgeon.
12...	Shellfish..........................	Including canned, frozen, cooked, dried; also frog legs, turtle.

Table 10.--Eggs

Col. No.	Heading	Notes
2....	Total (fresh equivalent)..............	See "Definitions and Explanations," Eggs: Fresh Equivalent. Cols. 3-7, cooked, and in-shell equivalent of liquid eggs (yolks, whites, yolks and whites mixed).
	Fresh, in shell:	
3....	Small................................	Also peewee, pullet.
6....	Extra large..........................	Also jumbo.
	Processed:	
8....	Total (fresh equivalent)............	See "Definitions and Explanations," Eggs: Fresh Equivalent. Col. 9 and processed eggs.
9....	Substitutes..........................	Liquid, powdered and frozen products such as Second Nature, Egg Beaters, Eggstra.

Table 11.--Sugar, sweets

Col. No.	Heading	Notes
	Sugar:	
2....	Total................................	Cols. 3-7 and maple, infant formula sugars.
5....	White, powdered.....................	Including confectioners'.
6....	Brown...............................	Including unrefined sugar, turbinado natural sugar, sugar in the raw.

Table 11.--Sugar, sweets--Continued

Col. No.	Heading	Notes
7....	Substitutes........................	Including brown and white sugar replacements such as Sugar Twin.
	Sirup, molasses, honey:	
9....	Sirup, total........................	Cols. 10, 11, and sorghum, cola, fruit, and dietetic sirups.
10...	Sirup, corn, cane..................	Also blends of corn and cane.
11...	Sirup, maple........................	Also blends with maple.
	Jelly, jam:	
14-16	....	Including home- and commercially preserved.
16...	Jam, fruit butter..................	Also preserves, marmalade, fruit topping, pastry filling.
	Candy, topping:	
17...	Total..............................	Cols. 18-21 and diet candy.
21...	Without nuts, no chocolate.........	Also candied fruits, peels; food sticks.
	Miscellaneous sweets:	
22...	Total..............................	Cols. 23-26 and fruit pectin, junket tablets, meringue shells.

Table 12.--Potatoes, sweetpotatoes

Col. No.	Heading	Notes
	Fresh:	
2....	Total	Cols. 3, 4, and yams.
3....	White	Also home-canned and home-frozen.
4....	Sweetpotatoes	Also home-canned, home-frozen, cooked.
	Commercially canned:	
5....	Total	Cols. 6, 7, and yams.
	Commercially frozen:	
11...	White, other	Mashed, baked, scalloped, puffs, cottage fries, hash browns, potatoes with additions, potato pancakes.
13...	Dried	Also potato pancake mix, yams.
14...	Chips, sticks	Including extruded and artificially shaped chips.
15...	Salad, other cooked	Including carryout french fries, potatoes with additions.

Table 13.--Fresh vegetables

All columns also include home-canned, home-frozen, and cooked vegetables.

	Dark green:	
8....	Leafy, other	Chard, cress, endive, parsley; beet, turnip, radish, and wild greens.
14...	Tomatoes	Also tomato aspic, ready-to-eat.

Table 13.--Fresh vegetables--Continued

Col. No.	Heading	Notes
	Other green:	
22...	Peas	Green or english, cow, field, black-eyed, snowpeas, chickpeas, garbanzos, pigeon peas.
23...	Other	French or globe artichokes, brussels sprouts, green soybeans, bean curd.
	Other vegetables:	
27-28	Onions	Also garlic, chives, scallions, leeks.
33...	Other	Eggplant, horseradish, kohlrabi, alfalfa sprouts, bean sprouts, mixed vegetables for salad or soup, mushrooms, parsnips, radishes, rutabagas, sauerkraut, succotash, summer squash.

Table 14.--Fresh fruit

All columns also include home-canned, home-frozen, and cooked fruit.

Col. No.	Heading	Notes
	Citrus:	
6....	Other	Tangerines, kumquats, tangelos, temple oranges, fresh citrus segments, mixed citrus fruit basket.
	Other vitamin C rich:	
7....	Total	Cols. 8, 9, and currants, acerola cherries, mango, guava, persimmons.

Table 14.--Fresh fruit--Continued

Col. No.	Heading	Notes
	Other:	
10...	Total	Cols. 11-23 and figs, dates, pomegranates, mixed fruit.
12...	Bananas	Also plantains.
15...	Melons except cantaloup	Watermelon, casaba, honeydew, mixed melon balls.
18...	Apricots	Also nectarines, loquats.

Table 15.--Commercially canned vegetables, fruit

Fruit columns include fruit for pie filling.

Col. No.	Heading	Notes
	Vegetables:	
3....	Dark green	Collards, spinach, kale, salad greens, chard, mustard, turnip, beet greens, cress, pimientos, peppers.
4....	Deep yellow	Carrots, carrots and peas, pumpkin, winter squash.
5....	Tomatoes	Also aspic, paste, puree, sauce, and tomatoes with vegetables.

Table 15.--Commercially canned vegetables, fruit--Continued

Col. No.	Heading	Notes
	Other vegetables:	
8....	Baked beans..........................	Also mature beans and peas, lentils; bean curd, paste.
10...	Snap beans...........................	Green, wax or yellow, shellie beans.
11...	Beets................................	Including pickled beets, beets and greens.
12...	Corn.................................	Also large hominy.
13...	Green peas...........................	Also immature field, cowpeas, and black-eyed peas; snowpeas, green pigeon peas.
15...	Other................................	Chinese vegetables, horseradish, mixed vegetables, mushrooms, onions, okra, squash, succotash, artichokes.
16...	Dietary pack.........................	Including only items specifically labeled as diet.
	Fruit:	
18...	Citrus...............................	Citrus segments, kumquats, tangerines.
28...	Other................................	Avocado, figs, grapes, plums, bananas, dates, prunes, mangoes, persimmons.
29...	Dietary pack.........................	Including only items specifically labeled as diet.

Table 16.--Commercially frozen vegetables, fruit

Col. No.	Heading	Notes
	All vegetable columns include vegetables with sauce, nuts, mushrooms or other additions.	
	Vegetables:	
3	Dark green, total	Cols. 4, 5, and peppers.
4	Dark green, leafy	Collards, spinach, chard, kale, parsley, mustard, and turnip greens.
6	Deep yellow	Carrots, carrots and peas, squash, pumpkin.
10	Other vegetables, snap beans	Green, wax or yellow; also italian, broad beans.
11	Other vegetables, green peas	Also black-eyed peas, cowpeas, edible podded peas.
14	Other vegetable, other	Brussels sprouts, cauliflower, okra, onions, dry beans, mushrooms, eggplant, summer squash, succotash, beets.
	Fruit:	
15	Total	Cols. 16, 17, and citrus segments.
17	Other	Apples, apricots, blackberries, blueberries, cherries, cranberries, melon balls, mixed fruit, peaches, pineapple, raspberries, rhubarb, bananas.

Table 17.--Juice--Vegetable, fruit

Col. No.	Heading	Notes
	Vegetable, canned:	
4....	Other................................	Carrot, mixed vegetable, sauerkraut.
	Vegetable, frozen:	
5....	....	Commercially frozen--concentrated; home-frozen--single strength.
	Fruit, canned:	
10...	Citrus, other.......................	Lemon, lime, tangerine, blends of citrus with or without noncitrus.
12...	Noncitrus, apple, cider.............	Also blends with apple.
15...	Noncitrus, other....................	Prune, fig, blackberry, papaya, apricot-pineapple.
	Fruit, frozen:	
16-21	....	Commercially frozen--concentrated; home-frozen--single strength.
19...	Citrus, other.......................	Grapefruit, lemon, lime, tangerine, blends of citrus with or without noncitrus.
20...	Noncitrus, total....................	Col. 21 and apple, cider, pineapple.
	Fruit, fresh:	
22...	Total...............................	Col. 23 and apple, prune, grape.
23...	Citrus..............................	Also blends of citrus with or without noncitrus.

Table 18.--Dried vegetables, fruit

All columns include home-dried and commercially dried vegetables and fruit. Canned, frozen, and cooked dried items are also included except for commercially canned dry beans and peas (table 15).

Col. No.	Heading	Notes
	Vegetables:	
2	Total	Cols. 3, 4, and other dried vegetables.
	Fruit:	
7	Raisins	Also currants.
8	Other	Apples, apricots, cherries, dates, figs, peaches, pears, mixed fruit, berries.

Table 19.--Beverages

Col. No.	Heading	Notes
	Coffee:	
2	Total	Cols. 3-5 and liquid concentrate, dry coffee mix such as Cafe Francais, Swiss Mocha.
3	Bean, ground	Also coffee mixed with chicory or wheat such as Luzianne and Mellow Roast.
4	Instant	Also coffee mixed with chicory such as Sunrise.
5	Substitutes	Products such as Postum, Pero, chicory.

Table 19.--Beverages--Continued

Col. No.	Heading	Notes
10...	Cocoa, chocolate......................	Including cocoa without dry milk; baking chocolate; chocolate sirup or topping.
	Soft drink:	
11...	Total...............................	Cols. 12-14 and ginger ale, quinine water, root beer, club soda.
14...	Diet................................	Products reported as low-calorie or dietetic.
	Fruit ade, drink, punch, nectar:	
15-20	....	Also nonalcoholic cocktail mix.
18...	Concentrated, frozen................	Including imitation breakfast drinks such as Awake, Bright and Early, and Orange Plus.
19...	Powdered, tablet, with sugar........	Including imitation breakfast drinks such as Tang and Start.
20...	Powdered, tablet, without sugar.....	Including artificially sweetened.
	Alcoholic beverage:	
23...	Whisky, gin, rum....................	Also vodka.
24...	Wine................................	Including champagne, sangria, vermouth; also ready-mixed cocktails.
25...	Brandy, liqueur.....................	Including cordials, fruit brandy; also tequila.

Table 20.--Soups, sauces, gravies

Col. No.	Heading	Notes
	Ready-to-serve:	
2....	Total	Col. 3 and all other ready-to-serve soups. Including commercially canned, home-canned, home-frozen, and cooked.
3....	Mostly meat	Also mostly poultry, fish, or legume.
	Condensed, semi-condensed:	
4....	Total	Cols. 5-9 and soups mostly milk or milk products such as cream soups other than mushroom or potato.
5....	Mostly grain	Including soups with noodles or rice.
6....	Mostly meat	Also soups mostly poultry, fish, or legume.
8....	Tomato	Including gazpacho, tomato rice.
9....	Mostly other vegetable	Including vegetable, minestrone, onion, potato, cabbage, vegetable with beef or poultry.
	Dry, dehydrated:	
10...	Total	Cols. 11-13 and mushroom, tomato and soups mostly milk or milk products.
11...	Mostly grain	Including soups with noodles or rice.

Table 20.--Soups, sauces, gravies--Continued

Col. No.	Heading	Notes
12...	Mostly meat..........................	Also soups mostly poultry, fish or legume; bouillon cubes, granules, powder.
13...	Mostly other vegetable.............	Green pea, onion, vegetable, minestrone, potato soups. Also seasoning mix.

Table 21.--Nuts, condiments, leavenings

Col. No.	Heading	Notes
	Nuts, peanut butter:	
3....	Nuts, total (shelled wt.)...........	Cols. 4-8 and soy nuts, nut substitute and coconut milk.
6-8..	Other nuts..........................	Also pumpkin, squash, and sunflower seeds.
9....	Peanut butter.......................	Also peanut spread and other nut butter.
	Condiments:	
10-17	....	Including home-prepared and commercially prepared.
11...	Catsup, chili sauce.................	Also cocktail sauce.
12...	Barbecue sauce......................	Also spaghetti sauce, pizza sauce, hot enchilada sauce.
13...	Tomato relish.......................	Also tomato pickles.
	Leavenings:	
19...	Yeast...............................	Also brewer's powdered.

Table 22.--Mixtures, baby food mixtures

Col. No.	Heading	Notes
	Ready-to-eat:	
2....	Total..............................	Cols. 3-6 and mixtures mostly milk, milk products.
5....	Mostly poultry, fish...............	Also egg or legume.
	Canned or frozen:	
7....	Total..............................	Cols. 8-11 and mixtures mostly milk, milk products.
10...	Mostly poultry, fish...............	Also egg or legume.
15...	Baby food mixtures...................	Products such as milk and fruit puddings; vegetables with meat, cereal, egg.

Table 23.--Baby food

Col. No.	Heading	Notes
	Commercially canned:	
6....	Vegetables..........................	Including vegetable soup, sweetpotatoes.
7....	Fruit...............................	Including fruit with tapioca.
9....	Mixtures, total.....................	Cols. 10-13 and mixtures mostly milk, poultry, fish, egg, or legume.

Table 23.--Baby food--Continued

Col. No.	Heading	Notes
14...	Cereal..............................	Dry only; canned cereals with fruit or egg are included with mixtures.
15...	Teething biscuit....................	Also baby cookies, pretzels.

Table 24.--Money value of all food at home per person per week

Col. No.	Heading	Notes
2....	Average (dollars)...................	Money value per person calculated using population ratio procedure--aggregate value for all households divided by aggregate number of persons in all households.

COMPARISON WITH 1965-66 HOUSEHOLD FOOD CONSUMPTION SURVEY

Although methods used in the Nationwide Food Consumption Survey 1977-78 were generally the same as those used in the 1965-66 Household Food Consumption Survey, some changes were made that might affect comparability:

--Households received advance notice of the interview for the 1977-78 survey and were asked to keep notes on food used for the 7-day period preceding the interview. In 1965-66, households were interviewed at the time of initial contact.

--Households were offered a nonmonetary incentive for participating in the 1977-78 survey. None was offered in the earlier survey.

--In 1977-78, data were collected from all households. In the earlier survey, data were collected from "housekeeping" households only (households in which 1 person had 10 or more meals at home). Data in this report are for "housekeeping" households only.

--In 1977-78, households from which data were collected in the spring (3,473) comprised about one-fourth of the total survey of housekeeping households for the year; in 1965-66, spring accounted for about one-half (6,174).

--Separate data on the quantity of donated food received and on the percentage of households participating in the Food Distribution Program were not obtained in 1977-78, since food distribution to families had been almost completely discontinued. This information was requested and tabulated in 1965-66.

--In 1977-78, data on seasonings purchased during the week were collected but not tabulated. In 1965-66, those data were both collected and tabulated.

--Income data for 1977-78 included the income of all household members age 14 and older (except roomers, boarders, and employees). In 1965-66, income data included only all related persons living in the household whom the respondent considered as part of the family's financial matters.

--In 1977-78, specific income data were collected. In 1965-66, respondents indicated which 1 of 14 income classes corresponded most closely to their family's income after taxes.

Schedule Modification

The 1977-78 schedule followed essentially the same format as the schedule used in 1965-66. Respondents, however, were asked more detailed questions on the social and economic characteristics of the household in 1977-78. They also were asked a few additional questions related to food consumption. Information about the following additional factors was collected in 1977-78:

--Education and employment of the male head of the household and occupation of both the male and female household heads.

--Amount of the last month's income from specified sources for each household member age 14 and older (except roomers, boarders, and employees) and the amount of last year's income both before and after taxes.

Table 25.--Food used at home, spring 1965 and 1977, West
(Per person per week)

Food groups and selected items	Quantity (pounds)		Percent change

[1] Less than 0.5 percent but more than 0.

[2] The 1965 data include purchases of tea during the survey week. The 1977 data include quantities of tea used during the survey week.

--Participation in and eligibility for participation in the Food Stamp Program, WIC, National School Lunch and School Breakfast Programs, and elderly feeding programs.

--Food shopping practices.

--For each food item used, the quantity bought and the price paid for that quantity.

Changes in Groupings of Food Items in 1977-78

--Miscellaneous sweets (fruit ices, gelatin, icing mixes, pudding, and pudding mixes) are grouped with sugars and sweets. They were with mixtures in 1965-66.

--Soups, sauces, and gravies are now considered a separate food group. They were with mixtures in 1965-66.

--Commercially canned diet vegetables and fruits are shown separately. They were included with the specific commercially canned item in 1965-66.

--Mixed-grain cold cereals are shown separately. They were included with the grain listed on the label as the first ingredient in 1965-66.

--Batters and doughs are shown separately. They were included with the ready-to-eat baked items in 1965-66.

--Sugar substitutes (quantity used) are grouped with sugars and sweets. Purchases of sugar substitutes during the week were with seasonings in 1965-66.

--Iced tea mixes, with and without sugar, are grouped with tea. They were with ades and punches in 1965-66.

--Use of tea (quantity) is shown. Purchases were shown in 1965-66.

--All kinds of ground beef are grouped together. Specified cuts of beef that were used ground were with the specified cut in 1965-66.

--Mixtures are categorized by the way in which they were processed--ready-to-eat, canned, frozen, or dried. They were designated by the predominant food in the mixture in 1965-66--mostly meat, mostly grain, mostly vegetable, mostly fruit, mostly milk products.

Data Tabulation

--The 1977-78 data are classified by the 1976 or 1977 income before taxes. The 1965-66 data were classified by the 1964 or 1965 money income after taxes.

--The 1977-78 urbanization categories are central city, suburban, and nonmetropolitan. Definitions are based on the size of the place in which the residence was located and for metropolitan households, the location within a standard metropolitan statistical area (SMSA). In 1965-66, urbanization categories used for tabulating data were urban, rural nonfarm, and rural farm. Definitions were based on the size of place in which the dwelling was located and the presence of a farm operator for rural households.

To help those who wish to make comparisons between the two surveys, some comparable data for the West are listed below:

	1965	1977
Median income before taxes......dollars.	---	12,000
Median income after taxes.........do....	5,800	10,000
Household size..................persons.	3.13	2.79
Money value of food per person..dollars.	11.43	21.61
At home.........................do....	9.35	16.33
Bought........................do....	8.85	15.30
Home-produced.................do....	.27	.47
Other.........................do....	.23	.57
Away from home..................do....	2.09	5.28
BLS Consumer Price Index, U.S. city average (1967=100.0), food at home (April, May, June)....................	94.1	192.1

For comparability with 1965 data, per-person values are based on 21 meals at home in a week.

SAMPLE ANALYSIS

Description of the Sample

Information for the Nationwide Food Consumption Survey 1977-78 was collected from 14,930 households of 1 or more members. The households were from a statistically selected sample of all private households in the 48 conterminous States, stratified by region, urbanization, and geographic or demographic similarities. Excluded from these reports are about 6 percent, or 900 households that were not housekeeping--no member ate 10 or more meals from the household food supply during the 7 days preceding the interview.

Design

This survey was designed as a self-weighting, multistage, stratified area sample of 15,000 households in the conterminous States. During each quarter, 3,750 households were to be sampled by use of an interpenetrating design (spring quarter was implemented in April, May, and June 1977; summer in July, August, and September; fall in October, November, and December; and winter in January, February, and March 1978). The sampling frame was organized by use of the 1970 Census of Population and Housing.

Stratification

The 48 conterminous States were divided into 114 strata on the basis of 3 levels of stratifications--geographic division, urbanization or zone, and demographic or other geographic similarities. Each of the nine Census geographic divisions that comprise the four Census regions (see tabulation) was divided into the three Census zones defined below:

Zone I (Central city)--the area comprised of the central city or cities (a city named in the metropolitan area title) in standard metropolitan statistical areas (SMSA);

Zone II (Suburban)--the area in SMSA's outside Zone I;

Zone III (Nonmetropolitan)--any area not included in Zones I and II.

Then, the two levels of division and zone were grouped at the third level based on cities or other political entities, economic trading areas, geographic units, and/or by size. This procedure resulted in 114 homogeneous strata of approximately 600,000 households each. The distribution of these strata by Census geographic divisions and zones is shown below:

Census region and division	Number of strata			
	Central city Zone I	Suburban Zone II	Nonmetropolitan Zone III	Division
Northeast:				
New England.......	2	3	2	7
Middle Atlantic...	8	9	4	21
North Central:				
East North Central	8	8	6	22
West North Central	2	2	5	9
South:				
South Atlantic....	4	6	7	17
East South Central	2	1	4	7
West South Central	4	2	5	11
West:				
Mountain..........	2	1	2	5
Pacific...........	6	7	2	15
Total.............	38	39	37	114

Primary Sampling Units

Every stratum was divided into one or more primary sampling units (PSU's). Each PSU was formed from cities, parts of cities, or from counties, and contained at least 10,000 housing units. Twelve strata were represented by only one PSU each, and these were picked with certainty.[1] From the other 102 strata, PSU's were drawn with probabilities proportional to size.

Selection of Area Segments within PSU's

Each PSU drawn was divided into small clusters of housing units called "area segments." The segments were designed, based on the 1970 Census, to contain 100 or more housing units and usually consisted of 1 or more city blocks in urban areas and part of a Census Enumeration District elsewhere. From the PSU's, 2,550 segments were drawn; the number of segments in a PSU was proportional to the size of the stratum in which the PSU was located. The probability that an individual segment would be drawn from a PSU was proportional to the ratio of the number of housing units in the segment to the total number of units in the PSU.

Prelisting of Area Segments

All 2,550 area segments were prelisted to determine the number of occupied housing units. Then, the national increase in the number of housing units from 1970 to 1977 was estimated. This information, together with estimates of occupancy and completion rates, permitted calculation of sampling ratios for the area segments that would yield a total of 3,750 households per quarter.

BLANK PAGE

Selection of Sample Housing Units

For the first two quarters, an average sampling ratio of 2.3 households per segment was used. The housing units were ordered within their respective segments. For each quarter, a sample was systematically selected from each segment, without replacement, after a random start. By the end of the second quarter, the estimated completion rate had been adjusted, and an average sampling ratio of 2.86 households per segment was used for the last two quarters. With the above adjustments, the target of responses from 15,000 households was closely approximated during the year-long survey period.

Weights

Although this survey was designed to be self-weighting, it was determined after the survey ended that the completion rates for the various PSU's differed at a statistically significant level. Therefore, weighting factors were applied to data from completed schedules. The weights were calculated for each quarter for every PSU. The weights were designed to be proportional to the ratio of the expected number of completed schedules in a PSU to the collected number of completed schedules in a PSU; weights were scaled so that there would be 3,740 completed schedules per quarter. After weighting was completed, a few household schedules had to be discarded because of invalid or incomplete data. The following tabulation gives the weighted and unweighted household counts by season, including nonhousekeeping households:

Quarter	Weighted count	Unweighted count
Spring...........	3,739	3,322
Summer...........	3,728	3,468
Fall.............	3,728	4,071
Winter...........	3,731	4,069
Total..........	14,926	14,930

Collection Counts, Spring 1977

The following are the weighted and unweighted counts of the surveyed households, including nonhousekeeping households, distributed by geographic division and urbanization:

Census division	Urbanization					
	Central city		Suburban		Nonmetropolitan	
	Weighted count	Unweighted count	Weighted count	Unweighted count	Weighted count	Unweighted count
New England..........	61	60	88	63	66	65

MEAN VALUES AND STANDARD ERRORS OF FOOD GROUPS AND SELECTED ITEMS

The average (mean) values in this report are based on data for households from the sample and hence may differ somewhat from the figures that would have been obtained if data had been taken from all U.S. households by use of the same questionnaire, interviewer, and coder. Sample surveys are subject to two types of errors--nonsampling and sampling.

Nonsampling errors can be attributed to many sources: Inability to obtain information about all cases; definitional difficulties; differences in interpretation of the question; inability or unwillingness of the respondents to provide correct information; errors in recording or coding the data; and other errors of collection, response, processing, coverage, and estimation of missing information. Because of the number of possible sources of error, measurement of the total nonsampling error is very difficult.

Although the respondents in this survey were asked to give the prices of the food items that were originally bought, the prices for those items reported as home-produced and as gift or pay were not asked. Instead, the money value of these food items received without direct expense by a household was based on the average (mean) price per pound paid for comparable food by surveyed households in the same region. Imputations of this sort may have contributed further to nonsampling error.

Sampling errors occur by chance because a sample rather than the entire population was surveyed. The standard error estimates the precision with which a mean value from a sample approximates the difference between the sample data and the data that would have been obtained from the entire population. Furthermore, the standard error partially reflects the variation in the estimates from some nonsampling errors, but it does not measure per se, any systematic biases in the data. In effect, standard error measures sampling and random nonsampling errors. The sample estimates and their estimated errors enable one to construct confidence intervals or ranges that would include the average result of all possible samples with a known probability. The procedure, as illustrated below, provides a method to construct interval estimates so that a known proportion of the intervals would contain the average of all possible samples. For example, if all possible samples were selected, each of these was surveyed under essentially the same general conditions, and an estimate and its estimated standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from 1 standard error below the estimate to 1 standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from 2 standard errors below the estimate to 2 standard errors above the estimate would include the average result of all possible samples.

The average result of all possible samples either is or is not contained in any particular computed interval. For a particular sample, however, the average result of all possible samples is included, with specific confidence, in the constructed interval. For example, the mean money value per household in the West for the meat group was $11.68 during the spring and its corresponding standard error was $0.49. This means that the 68-percent confidence interval around $11.68 is from $11.19 to $12.17. It can, therefore, be asserted at a 68-percent level of confidence that the sample mean of $11.68 will differ by less than plus or minus $0.49 from the mean from a complete population. At a 95-percent level of confidence, it will differ by less than plus or minus $0.98.

Table 26.--Mean values and standard errors of household food used in a week, West, all urbanizations, spring 1977

Food groups and selected items	Quantity	Standard error of quantity	Money value	Standard error of money value

All Urbanizations

Includes all households in central city, suburban, and nonmetropolitan areas. See "Urbanization."

Bought Food - See "Source of Food."

Calcium Equivalent

The quantity of whole fluid milk to which the various dairy products (excluding butter) and nondairy products containing milk derivatives are equivalent in calcium content. The chief source of data on the calcium content of the various dairy products was "Composition of Foods: Dairy and Egg Products: Raw, Processed, Prepared," U.S. Department of Agriculture, Agriculture Handbook No. 8-1, November 1976.

Central City - See "Urbanization."

Eggs: Fresh Equivalent

The quantity of fresh eggs plus frozen, dried, or liquid eggs without shell (whether the whole egg, whites, or yolks only), and of cooked eggs or substitutes converted to the weight of equivalent eggs in shell. The source of most factors was "Conversion Factors and Weights and Measures for Agricultural Commodities and Their Products," U.S. Department of Agriculture, Statistical Bulletin No. 362, June 1965.

Food at Home

Food and beverages (alcoholic and nonalcoholic) from the household food supplies "used" during the 7 days before the date of the survey interview, whether bought or received without direct expense. This included food and beverages eaten at home, carried from the home in packed meals, thrown away, or fed to pets. Food fed to animals raised for commercial purposes and commercial "pet" food were omitted. Food that was obtained with cash, credit, or food stamps, and food that was home-produced, received as a gift or payment for goods and services, or received through Federal assistance programs or from welfare agencies was included.

Any food from the respondent's household that was given away for use outside the home, such as food sent to friends and relatives, gifts of food donated to church suppers, and food given to household help to take home, was not considered as food used by the household.

Food used at home was classified as fresh, commercially canned or frozen, home-canned or -frozen, already cooked, and dried. Generally, food used at home was reported in the form brought into the kitchen.

Homemade mixtures used during the week were reported either as ingredients if prepared during the week or as the product, if prepared before the survey week. For example, a homemade cake prepared any time within the survey week was included with quantities of flour, eggs, sugar, fat, and milk. But a homemade mixture used during, but prepared before, the survey week was recorded in the name of the product in the same way as a commercially prepared mixture was recorded. To illustrate, a cake that was prepared at home on any day before the survey week, or a bakery cake that was brought from the store into the kitchen, was entered on the schedule as a ready-to-eat cake.

If home-canned or home-frozen vegetables and fruit and home-preserved jelly, jam, pickles, or relish were processed before the survey week, they were also recorded in the same way as commercially prepared mixtures. However, when the canned, frozen, or preserved food was made at home during the 7-day period, only the ingredients of the portion used during that period were recorded.

Regardless of the time of preparation, homemade butter, cheese, cream, and buttermilk were always reported as the products rather than as ingredients.

Food at Home Not Bought

Food used at home that was home-produced or received as a gift or instead of pay. See "Source of Food."

Food Away From Home

Any food and beverages (alcoholic and nonalcoholic) in meals and snacks purchased by the household for themselves and their guests away from home during the week. The expense for such food and beverages included sales tax and tips. Food eaten by the household in other homes or elsewhere as guests or employees for which no household expense was involved was not included in expense for food away from home. See "Food Away From Home Not Bought."

Food Away From Home Not Bought

The number of meals with no expense to the household, that is, meals eaten by household members in other homes or elsewhere as guests or employees.

Home-Produced Food - See "Source of Food."

Household

A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room that constitutes a housing unit. The survey does not cover group quarters, such as rooming houses, military barracks, and institutions.

Housekeeping Households

Those households with at least 1 person having 10 or more meals from the household food supply during 7 days before the interview. Data for nonhousekeeping households were collected but are not presented here.

Household Size

The total number of meals served to all persons in the household from home food supplies divided by 21 (based on 3 meals a day for 7 days for 1 person) to obtain the household size in equivalent persons. When meals reported eaten at home and away from home did not add to 21 meals for each person, the skipped meals were distributed as bought, free, and from household food supplies in the same proportion as the reported meals. The count of equivalent persons was not reduced in those households where members omitted meals nor was it increased for refreshments between meals. However, the meals served to guests, boarders, and employees were included.

Lunches carried from home, but supplemented by other food purchased, received as gift, or received instead of pay, were counted as one-half meal at home and one-half meal from one of the other sources; lunches supplemented only by beverages were counted as full meals at home.

Refreshments served to guests were also counted in the total meals from household food supplies, but were not given the same value as a full meal. Servings of a single food or two (for example, a glass of milk or a cup of coffee and a doughnut) were considered light refreshments and counted as one-fourth meal for each guest. More than two refreshment items served at one time, such as ice cream, cake, and coffee, were counted as one-half meal for each guest. Any refreshments served to persons who were part of the household were not counted unless they substituted for a regular meal.

Money Income Before Taxes

Respondent's estimate of the household's 1976 money income from all sources before the deduction of State and Federal income taxes. Income was counted for all persons living in the household except for roomers, boarders, and employees whether or not they ate at home during the week.

Money Value of Food Used at Home

Expenditures for bought food and money value of home-produced food and food received free of cost that was used during the survey week. Expenditures for bought food were based on prices reported as paid regardless of the time of purchase. Sales tax was excluded. Bought food with unreported prices, food produced at home, and food received as a gift or instead of pay were valued at the average price per pound paid for comparable food by survey households in the same region and season.

Nonmetropolitan - See "Urbanization."

Not Classified by Income

Households that were not household units for the previous year and households in which respondents were either unable or unwilling to give information about income.

Person

One equivalent person equals 21 meals at home in a week. Average quantities and money value of food used per person by groups of households are per 21-meal-at-home-equivalent person. See "Household Size."

Region

Those areas of the 48 conterminous States as defined by the U.S. Department of Commerce for the 1970 Census of Population. The four Census regions and their States are:

Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont;

North Central--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin;

South--Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia;

West--Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

Source of Food

Classification of food used as bought, home-produced, or received as gift or instead of pay.

Bought--Food received for cash, on credit, or with Federal food coupons such as food stamps and WIC vouchers.

Home-produced--Food raised for home use and food obtained by hunting, fishing, and gathering from the wild.

Received as gift or pay--Food received as gift from persons outside the household or as payment for services rendered.

Spring - The months of April, May, and June.

Suburban - See "Urbanization."

Survey Week

The continuous 7-day period before the survey interview during which the reported food was used. An interview that occurred on Monday morning after breakfast, for example, covered the period from Monday morning a week earlier after breakfast to the interview time.

Urbanization

Distinction of households in central city, suburban, and nonmetropolitan was based on the standard metropolitan statistical area (SMSA) as defined by the U.S. Department of Commerce in the 1970 Census of Population.

All urbanizations--Composite of central city, suburban, and nonmetropolitan households appropriately weighted.

Central city--Population of 50,000 or more and main or core city within SMSA.

Suburban--Generally within the boundaries of SMSA but not within legal limits of central city SMSA.

Nonmetropolitan--All U.S. areas not within SMSA.

Weights - See "SAMPLE ANALYSIS."
